

## Tutorial 6: Add a Table to Your Web Project

Points: 50

This week we will add a table to your web project. Tutorial 2's assignment, Start Your WebProject, had had you create the "bones" of your web project. In Tutorial 3's assignment, Create a Layout for Your WebProject, you created a layout of your web project. Tutorial 4's assignment asked you to add graphic design elements to your web project, while Tutorial 5's assignment had you add a responsive or mobile component to your web project.

If you have not completed any of the following, you will need to complete them before proceeding: Tutorial 2: Start Your Web Project, Tutorial 3: Create a Layout for Your Web Project, Tutorial 4: Add Graphic Design Elements to Your Web Project. Tutorial 5: Add a responsive or mobile component to your web project.

Requirements:

1. Create a table with four rows and three columns:
  - a. Apply a table border
  - b. Add a table caption
  - c. Create either a row span or a column span
  - d. Utilize color in the table
  - e. Content or data in the table
2. List changes to the **Web\_Project\_Notes** Word document:
  - a. filename of the modified HTML file
  - b. filename of the CSS file
3. Validate any files that you modified. Validation of HTML and CSS files carry a heavy point value on the Web Project Check and the Web Project!
4. Zip all the files and submit.
